bar service. (2025)

vitrum

What we do

At Vitrum we design, build and install professional kitchen, bar and retail systems. From individual bar modules to customized turn-key hospitality systems, Vitrum goes beyond manufacturing and installing bars — **we're a full-service partner committed to bringing your vision to life**, from concept to customisation.

Vitrum Signature Bars Collection

The Manhattan Bar

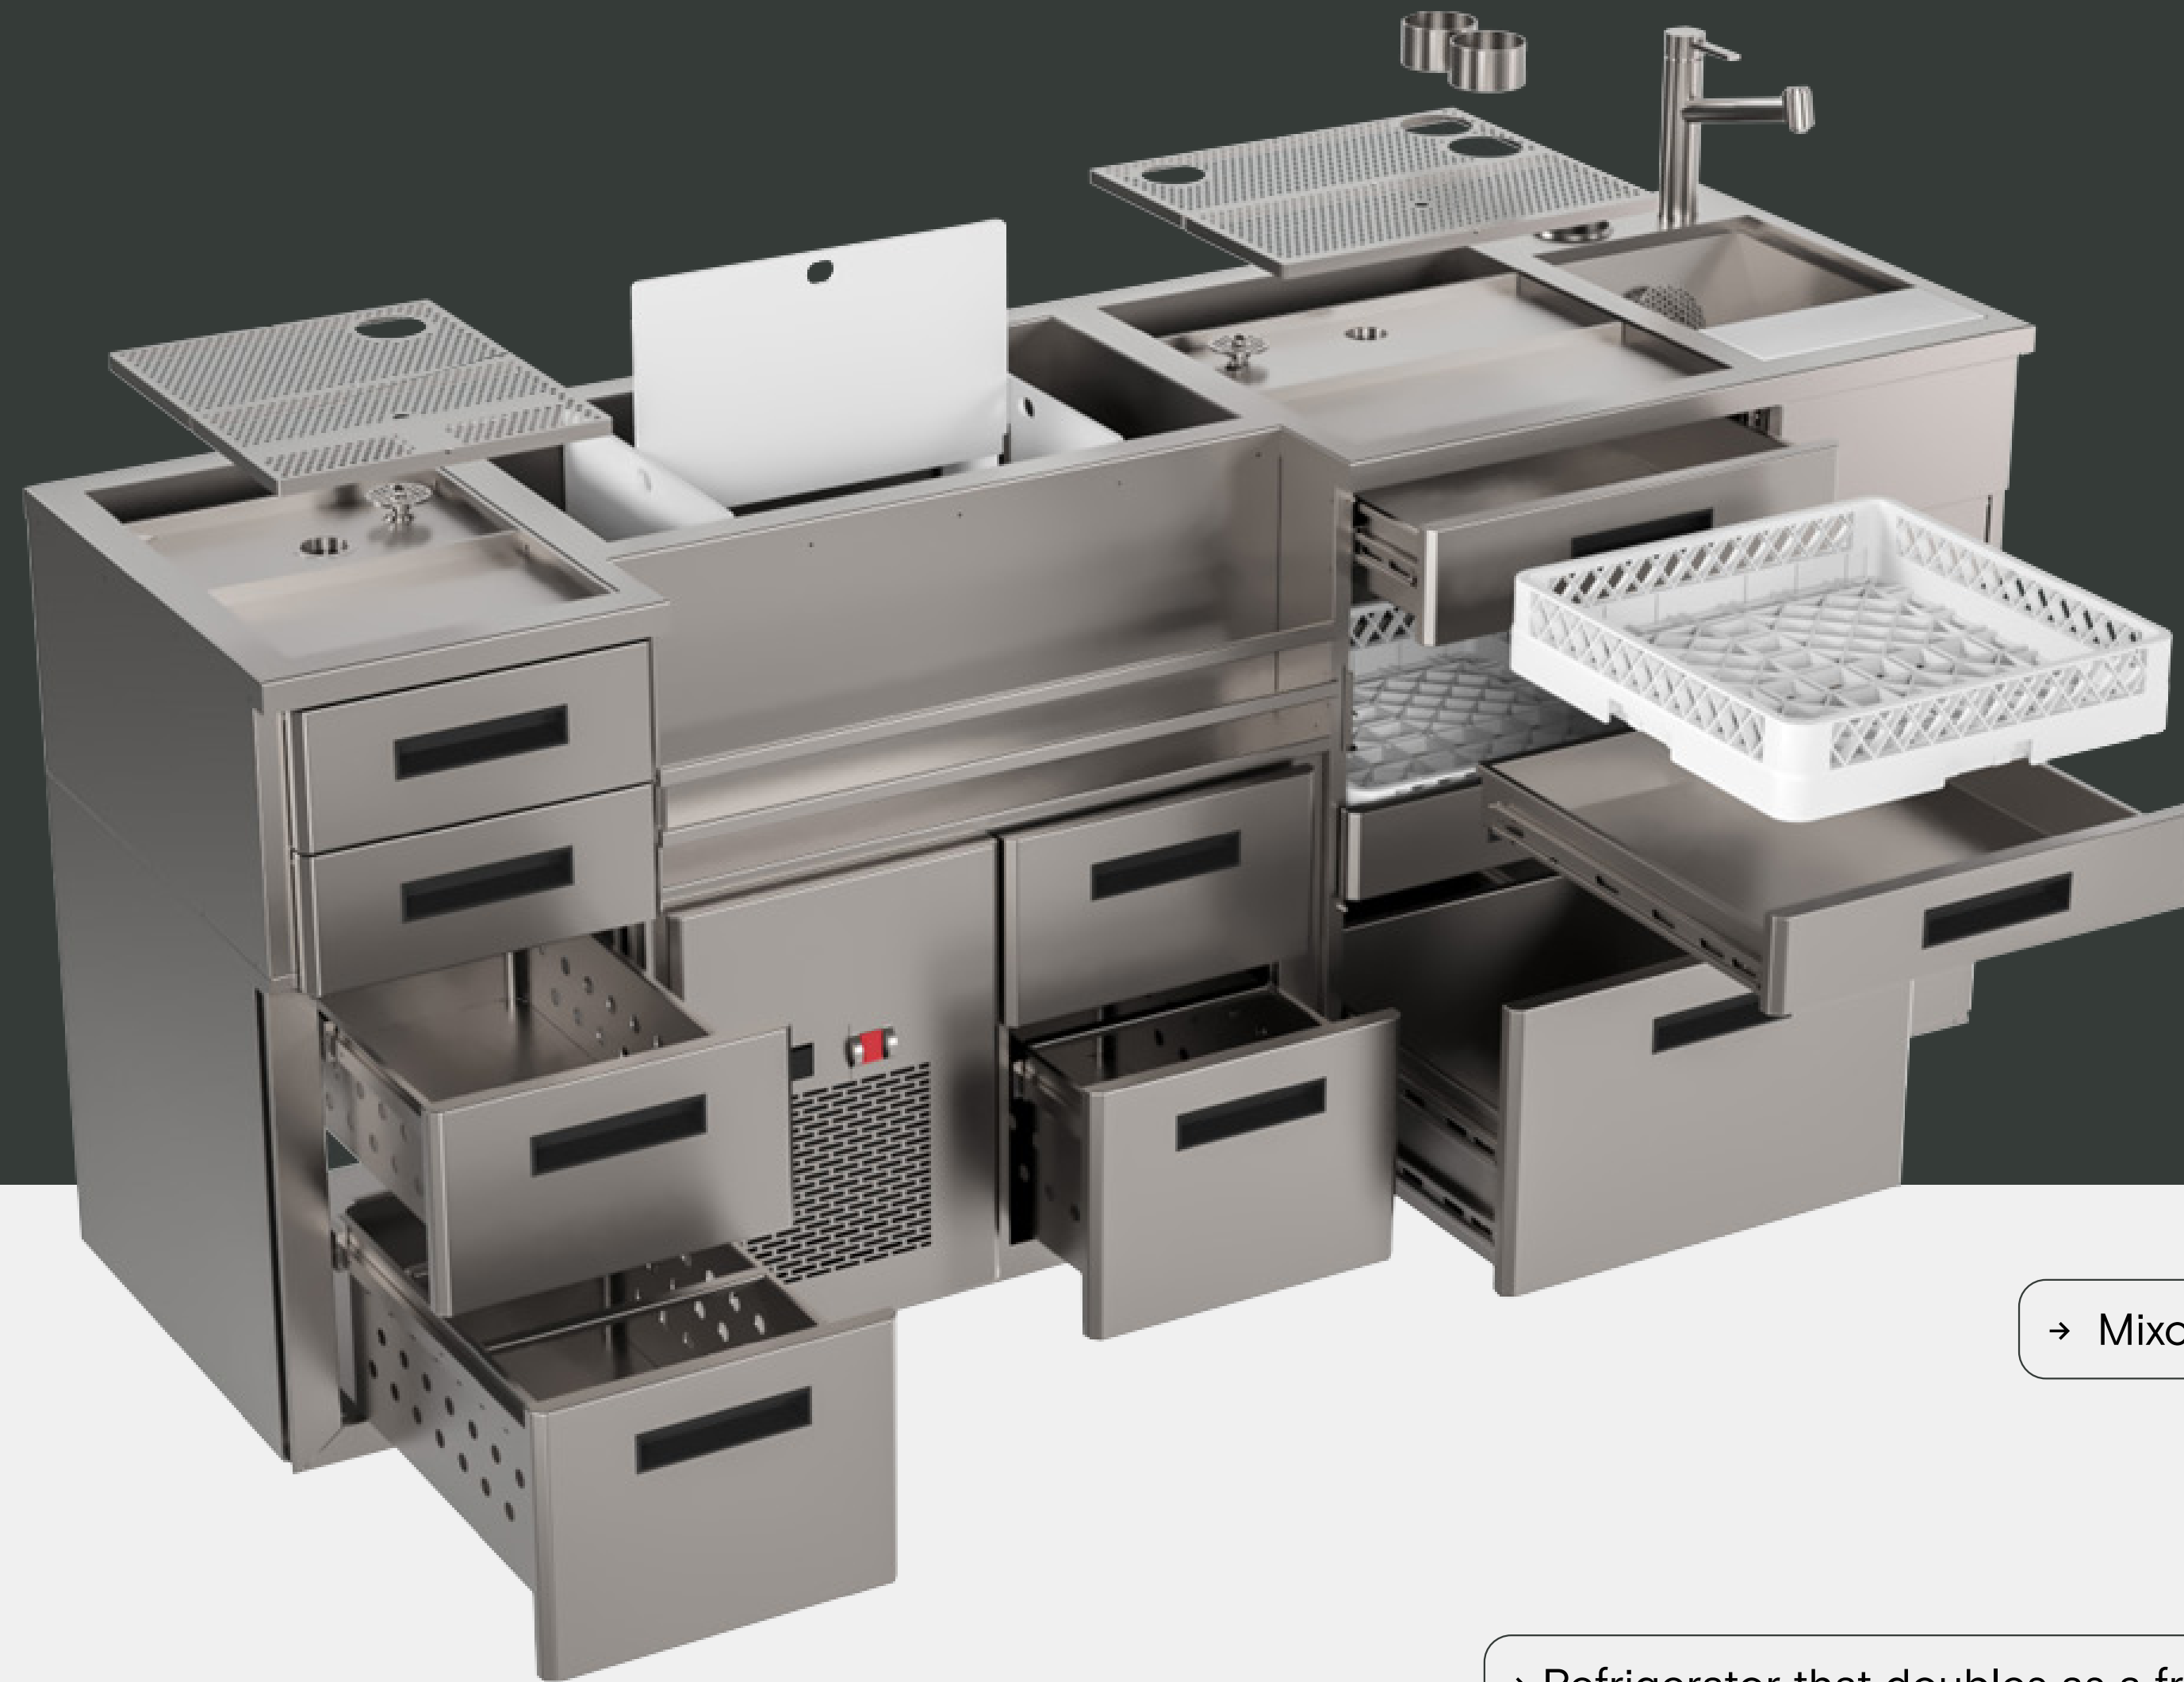

The Boulevardier

The Clover

Our bestselling two-person station was designed with the input of professional bartenders. It's the cornerstone of our line-up, providing an instant system from which to run a busy bar service.

→ Mixology on the right, ready-to-serve drinks on the left

→ Dividable ice wells

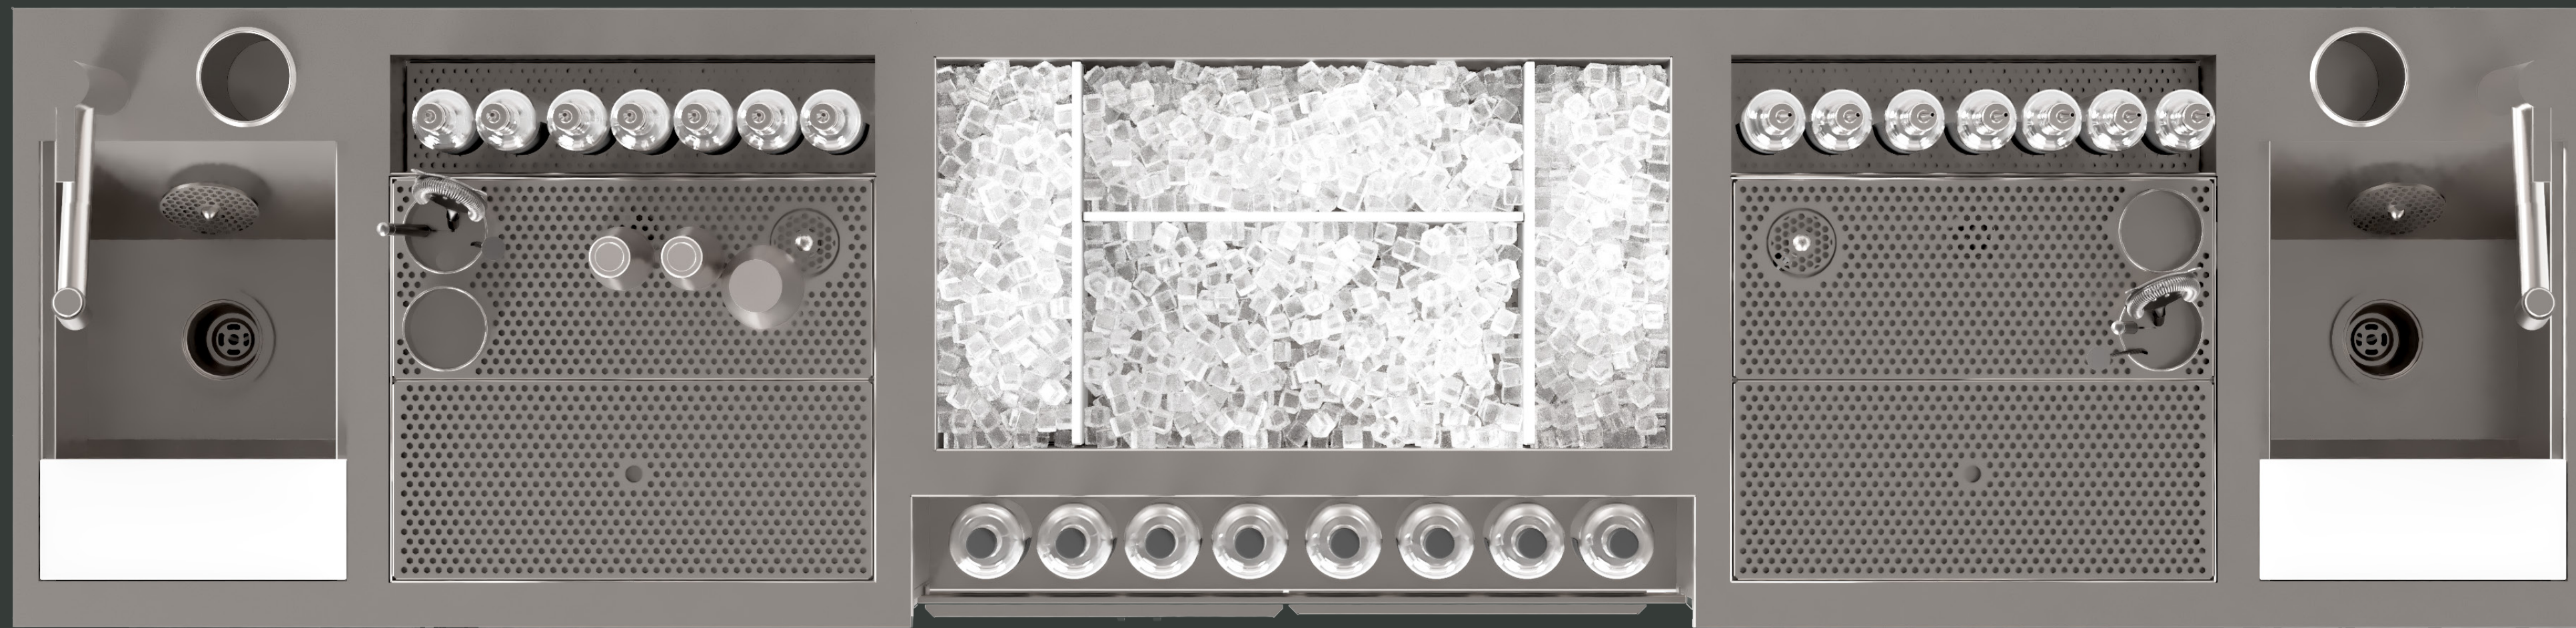

→ Customizable storage

→ Removable parts for easy cleaning

→ Optimized storage for glass, dishwashing baskets, bottles, ice and more

→ Refrigerator that doubles as a freezer up to -5°C

→ Strategically placed rinsers for ergonomic operation

A two-person station designed specifically for crafting artisanal cocktails. This system was borne from a client who needed to produce large volumes of cocktails within a limited space, and has fast become a client favourite.

→ Optimised to produce large volumes of cocktails mixed from scratch

→ Set up for two bartenders to work simultaneously

→ Ergonomic layout

→ Extensive storage for specialized tools and ingredients

→ High performance spec

For mixologists who craft intricate creations from myriad ingredients and garnishes, this station has been created to work with you. Its streamlined style and ample storage options are designed to stimulate creativity.

and seamless service

CONSULTATION¹

Whether you have a fully developed concept to bring to life or you're seeking a partner to inspire and advise, we take a hands-on approach from the early stages.

DESIGN²

We are methodical and collaborative in our design approach, producing visual renders and technical plans that cover every detail from plumbing to finishes.

PRODUCTION³

Our technical set-up allows us to efficiently manufacture bespoke, high-quality equipment that works seamlessly and reliably.

INSTALLATION⁴

Precision, fit and functionality are rigorously checked before products leave our factory. On-site, our teams install and test the system before the first service.

AFTER-SALES⁵

Training, servicing and long-term maintenance mean our relationship continues long after design and installation, so our clients can run their businesses with confidence.

Vitrum bars in action

Suelo Bar

Piazza Italiana

November Restaurant

The Catch

John Restaurant

Bar projects

Suelo Bar, Paris. Halcyon glamour powered by modern innovation.

With a smart Spanish restaurant on one level and an intimate speakeasy on the other, Suelo required us to tackle two projects in one. Upstairs in the dining room, our two-person bar station forms the hub from which to run a bustling service without imposing on the intimate ambience of the restaurant. Downstairs in the speakeasy, a customized U-shaped bar provides the centrepiece of the space, equipped with everything the team needs to craft world-class cocktails.

“We are very pleased with the outstanding work carried out by VITRUM and their dedicated team. From the very beginning, they understood our vision and expertly crafted two exceptional bars that perfectly align with the ambience and quality we strive to offer at Suelo. The bars have become a central feature of our hospitality experience, enhancing both the aesthetic and functionality of our space in the heart of Paris.”

— Iryna Ulanska, Bulldozer Group

Bar stories

Piazza Italiana, London. A hard-working spot for London's professionals.

Housed in a former bank in the heart of London's financial district, Piazza Italiana is an institution where deals are done and glasses are raised. Vitrum installed a full-service kitchen and two bars in the restaurant, which is equipped to handle a high volume of covers ordering from an extensive menu. The historic, listed nature of the site required us to work sympathetically alongside an extensive restoration of the building and its features.

Bar stories

November Restaurant, West Berlin. A bar at the heart of the neighbourhood.

November is a neighbourhood gem in West Berlin housed within a listed monument, meaning our work had to adhere to numerous architectural requirements. The Catch restaurant family group are long-standing clients, and for this project we were tasked with creating a bar that would provide the centrepiece for the main dining room. A single 6m slab of wood was specially selected, treated and imported, and our customised bar system embedded beneath it to provide the foundation for their Bib Gourmand service.

"In more than 10 years of working with Vitrum, I've come to see them not just as a supplier but as a trusted partner. What sets Vitrum apart is their personalized approach. Every project is handled with meticulous attention to detail. They are always ready to assist, offer solutions, and promptly respond to questions."

— Sergejs Šiporovs, Head Chef

Bar stories

The Catch – Berlin. High-end service requires a high-end bar solution.

Aesthetics are important in the restaurant industry, but if you can't run a seamless service it doesn't mean very much. And behind every seamless service lies a well-designed hospitality system. Tables are highly sought after at Alexander Slobin's Berlin project The Catch, where Vitrum was briefed to design a bar that would integrate seamlessly with the striking wooden countertop seating, neon lighting and stainless steel details.

Bar stories

John Restaurant, Riga. A Michelin-starred experience as standard.

Precise, premium and ambitious: that's what the dining and drinking experience at a Michelin-starred restaurant looks and feels like. Delivering these lofty standards isn't possible without careful choreography and considered infrastructure. Due to our wealth of experience, the team at John chose to work with us to create the bar from which they'd produce their refined pre- and post-dinner cocktails.

Day-to-day confidence, long after installation is complete

Our commitment to training, maintenance, expansion and servicing means that our clients show up to every service with total confidence in their bar systems.

Expert training

We work with your team on-site to optimize performance with our systems.

Proactive maintenance

Frequent tune-ups and prompt engineers whenever they're needed keeps your bar running flawlessly.

Expansion planning

Our modular system makes it easy to grow and adapt your bar as your business evolves.

Share your vision with us

Bringing your concept to life starts with an in-person (or virtual) consultation, where we can provide insight into the possibilities our systems offer.
